• 01 ABOUT THE COMPANY

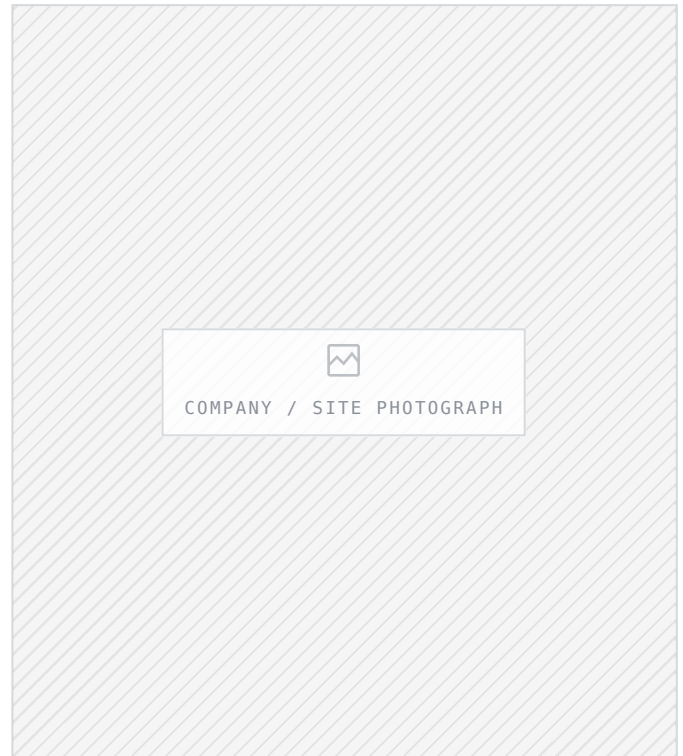

ENGINEERING RELIABILITY INTO EVERY BUILDING

Pavanasuta Enterprises is an MEP engineering and project solutions company based in Karnataka, providing integrated Mechanical, Electrical, and Plumbing services for buildings and facilities that depend on precise, dependable systems.

Our teams design, install, test, and maintain the mechanical, electrical, fire protection, and plumbing systems that keep buildings running — from air-conditioning and ventilation to power distribution, fire safety, and water systems. We serve hospitals, hotels, commercial buildings, residential projects, industrial facilities, and infrastructure developments across the region.

Every project is approached with the same priorities: engineering quality, on-site safety, technical expertise, and timely execution. We work closely with clients, consultants, contractors, and project stakeholders at every stage — from planning and installation through testing, commissioning, and long-term maintenance support.

This close, collaborative way of working has helped us build lasting relationships across the healthcare, hospitality, commercial, and industrial sectors we serve.

SUSTAINABILITY

• 03 SERVICE CAPABILITIES

MECHANICAL SERVICES

HVAC and air-conditioning systems engineered, installed, and commissioned for consistent indoor comfort and reliable long-term performance — from single split units to large chilled-water plants.

AIR-CONDITIONING SYSTEMS

- VRF / VRV air-conditioning systems
- DX air-conditioning systems
- Hi-wall air-conditioning systems
- Central air-conditioning systems
- Chilled-water systems

INSTALLATION & EXECUTION

- HVAC equipment installation
- Ducting and associated works
- HVAC piping and insulation
- Testing, commissioning, and support

HVAC INSTALLATION — SITE PHOTOGRAPH

03 SERVICE CAPABILITIES

FIRE PROTECTION SERVICES

Life-safety systems designed and installed to protect people, property, and business continuity – engineered, tested, and commissioned to the standards each facility requires.

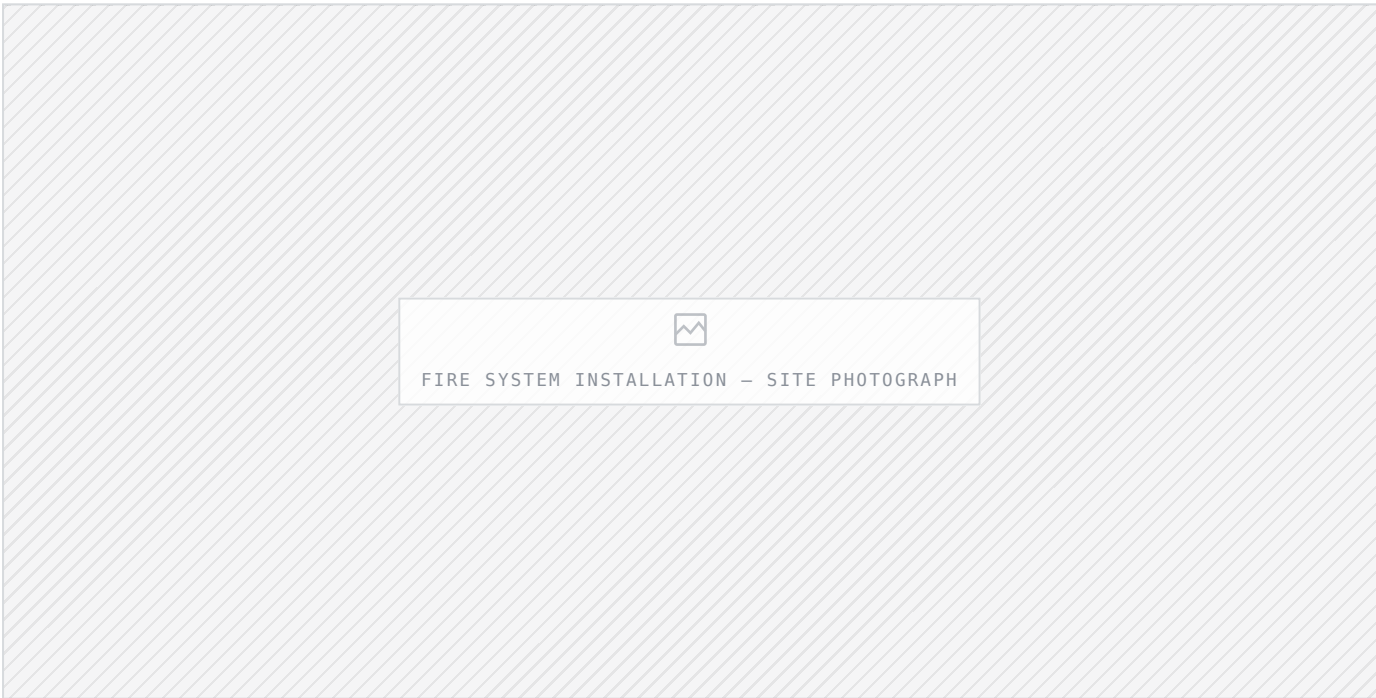

FIRE FIGHTING SYSTEMS

- Fire hydrant systems
- Fire-fighting piping networks
- Fire pumps and associated equipment
- Fire extinguishing systems

DETECTION & ALARM

- Fire alarm systems
- Detection and notification systems
- Alarm panels, detectors, manual call points
- Testing and commissioning

03 SERVICE CAPABILITIES

ELECTRICAL SERVICES

Power distribution, lighting, and infrastructure systems built for safe and dependable operation — from LT panels and internal wiring to street lighting and network cabling.

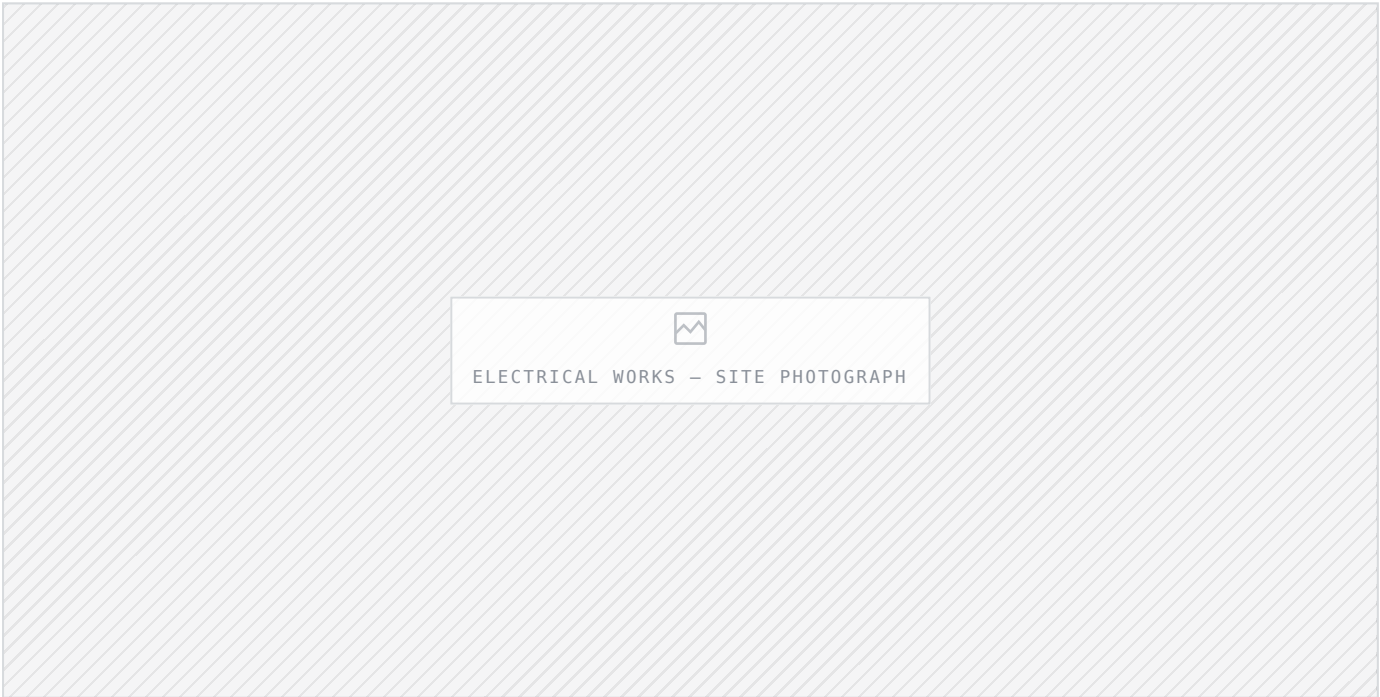

POWER & DISTRIBUTION

- LT panels
- Building electrical wiring
- Internal and external electrification
- Power distribution systems
- Cable laying

LIGHTING & INFRASTRUCTURE

- Lighting systems
- LED street lighting
- Networking infrastructure
- Testing and commissioning

03 SERVICE CAPABILITIES

PLUMBING & ADDITIONAL SERVICES

Water supply, drainage, and treatment systems, alongside supporting technical services that complete a building's operational infrastructure.

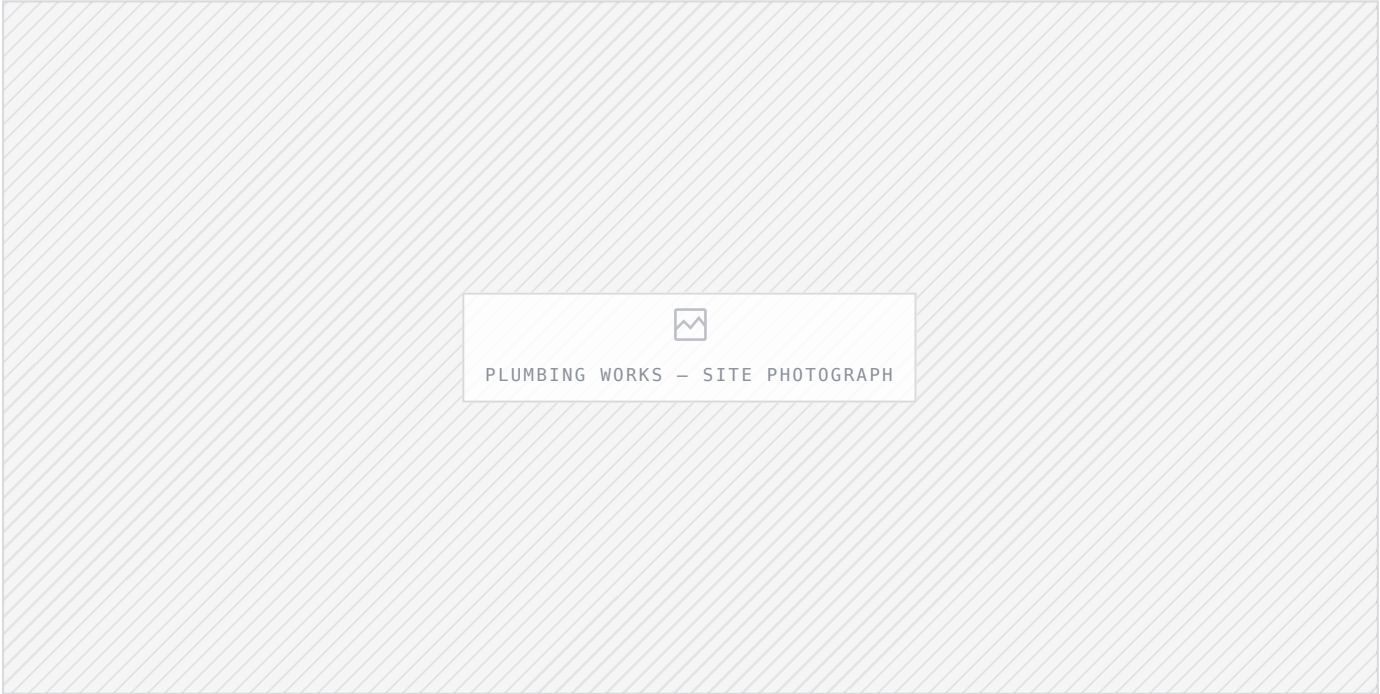

PLUMBING WORKS

- Plumbing installation
- Water supply and distribution systems
- Drainage and sewerage systems
- STP works
- WTP works
- Sanitary works

ADDITIONAL SERVICES

- CCTV and security systems
- Nurse calling systems
- Water and wastewater treatment solutions

KEEPING SYSTEMS RUNNING, LONG AFTER HANDOVER

AMC support is a major part of our business. We help hospitals, commercial buildings, and multi-site portfolios keep their MEP systems performing reliably through structured, scheduled maintenance — backed by clear reporting and documentation.

INCLUDED

Preventive Maintenance

Scheduled servicing to reduce breakdowns and extend equipment life.

INCLUDED

Breakdown Response

Responsive support to restore systems quickly when issues arise.

INCLUDED

Inspection Visits

Regular site inspections to catch issues before they escalate.

INCLUDED

Reporting & Documentation

Service records and reporting maintained for every visit.

INCLUDED

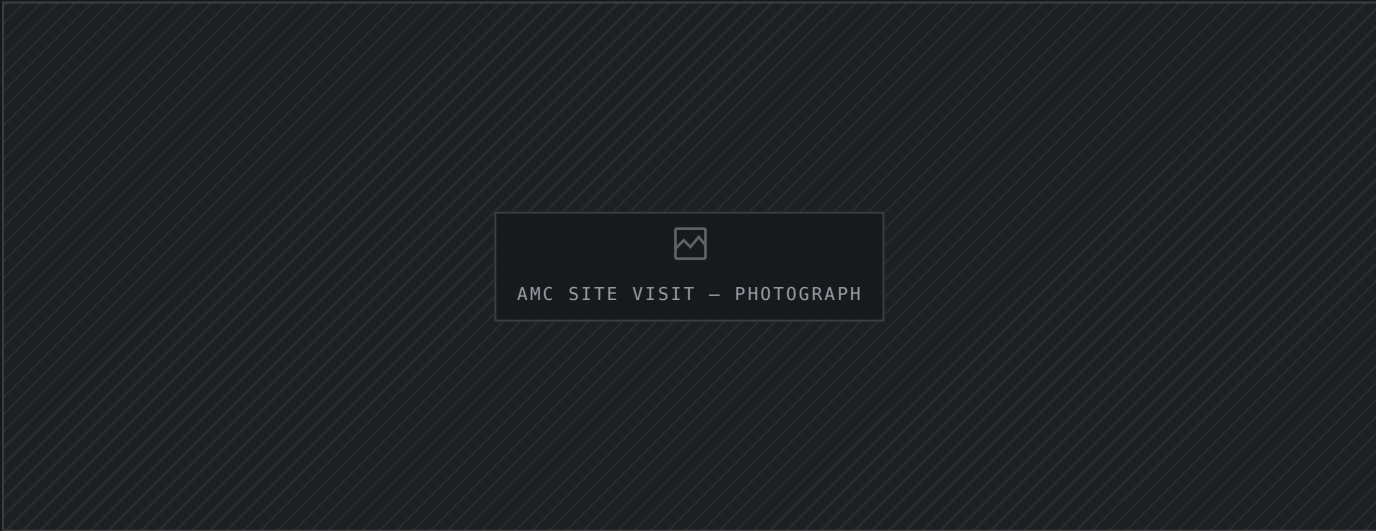

Energy Optimisation

Performance checks aimed at efficient, cost-effective operation.

PLAN OPTIONS

12 & 24-Month Contracts

Maintenance plans structured around each facility's needs.

AMC support is available across hospitals, commercial buildings, and facilities managing systems across multiple sites.

05 PROJECT PORTFOLIO

COMPLETED PROJECTS

A cross-section of completed MEP works across fire protection, HVAC, electrical, and plumbing — delivered for hospitals, hotels, industrial units, and commercial premises.

FIRE FIGHTING SYSTEM

COMPLETED

BS CHANNABASAPPA & SONS · DAVANAGERE

Fire-fighting system installation covering piping, pumps, and associated fire suppression equipment.

FIRE PROTECTION

HVAC VRF SYSTEM

COMPLETED

BKG GROUP · SANDUR

VRF air-conditioning system supply, installation, and commissioning for the facility.

MECHANICAL

FIRE HYDRANT, ALARM & EXTINGUISHER SYSTEM

COMPLETED

MANGO HOTEL · DAVANAGERE

Integrated fire hydrant, fire alarm, and fire extinguisher installation for hospitality-facility life safety.

FIRE PROTECTION

INTRUSION ALARM & FIRE FIGHTING SYSTEM

COMPLETED

MAX SHOW ROOM · DAVANAGERE

Combined intrusion alarm and fire-fighting system installation for retail premises security and safety.

FIRE & SECURITY

LED STREET LIGHTING

COMPLETED

AGRICULTURE FIELD

LED street lighting installation for an agricultural field site.

ELECTRICAL

BUILDING ELECTRIFICATION

COMPLETED

CHITRADURGA HOUSE

Complete building electrification covering internal and external electrical works.

• 07 WHY CHOOSE US

WHAT SETS US APART

01

ENGINEERING EXPERTISE

Technical knowledge across mechanical, electrical, fire, and plumbing disciplines.

02

QUALITY ASSURANCE

Consistent workmanship standards checked at every stage of execution.

03

SAFETY FIRST

Safety practices built into planning and on-site execution alike.

04

TIMELY DELIVERY

Project schedules managed closely to meet agreed timelines.

05

INTEGRATED MEP APPROACH

One team coordinating mechanical, electrical, fire, and plumbing scopes together.

06

CUSTOMER-CENTRIC SOLUTIONS

Solutions shaped around each client's building, budget, and timeline.

07

SUSTAINABLE & ENERGY-EFFICIENT PRACTICES

Energy-conscious system design and maintenance aimed at efficient, responsible operation.

• 08 LEADERSHIP MESSAGE

GENERAL MANAGER'S MESSAGE

“

At Pavanasuta Enterprises, our focus stays on delivering reliable, high-quality MEP solutions for every client we work with. We approach each project with integrity, precision, and professionalism — bringing the same discipline to a single-site installation as we do to a multi-building contract.

We continue to invest in innovation, safety, and timely project execution, because that is what our clients depend on. Above all, we value the partnerships we build along the way, and remain committed to supporting sustainable infrastructure for the communities we serve.

GENERAL MANAGER, PAVANASUTA ENTERPRISES

FOUNDER'S VISION

“

Our vision from the outset has been to build Pavanasuta Enterprises into a trusted leader in MEP engineering — a company known for innovative, sustainable, and high-quality solutions.

That vision is grounded in integrity, safety, and excellence at every stage of a project. As we grow, our priority remains building lasting relationships with our clients and partners, and contributing to future-ready infrastructure across the sectors we serve.
